

Hiring-Process.com USPS 473 sample PDF contains simulated questions of the 473 exam.

We have included sample questions below to help get a better idea of the questions and answers which are included in the real test.

# Postal 473 test sample

Study Guide

Hiring-process.com

---

## Coding - Instructions

There are 72 questions in this part of the real test. Each correct answer adds 1 point to your score, and each incorrect answer subtracts  $\frac{1}{3}$  of a point. The test consists of 7 consecutive, timed sections, of which only 2 are scored. Use the time of the unscored sections to study the Coding Guide. Note that this part of the test spans a total of 26:00 minutes. The sections are:

### 1. Introduction (2:00)

In this section, you will be introduced to the concept of the test. You will have the Coding Guide available and will be taught how the test works. You should fill out some of the questions and focus on studying the Coding Guide, as it should be the same one throughout the test. The reason you should bother to fill out some of the questions is because if you don't, an instructor may think you don't understand how the test works and will interrupt you while you study the Coding Guide.

Important; You should already start memorizing the Coding Guide in this section. It will be helpful for both scored sections of the test.

### 2. Coding Exercise (1:30)

In this section, you will have a chance to exercise. Again, you will have the Coding Guide available, so you should fill out some of the questions and focus on studying the Coding Guide.

### 3. Coding (6:00)

The first scored section. You will have 6 minutes to complete answer questions. Your score will increase by a point for each correct answer, and decrease by a third of a point for each incorrect answer. Fields left blank will not affect your score. Statistically, a guess is expected to change your score by exactly 0, so educated guesses will do more good than harm (except for the time you spend making it).

### 4. Study Period 1 (3:00)

This section's sole purpose is to study the Coding Guide in preparation for the Memory section.

### 5. Memory Exercise (1:30)

In this section, you will have a chance to exercise. You will not have the Coding Guide available this time. Use this time to find

out which streets you remember better and which you need to focus on in the next study period.

6. Study Period 2 (5:00)

Another section solely for preparing for the Memory section. Test yourself; look sideways and try to recite which addresses belong to which route.

7. Memory (7:00)

The second scored section. You will have 7 minutes to complete answer questions. Scoring works the same as in the coding section.

Good luck!

A <input type="radio"/> 10c
B <input type="radio"/> 9a
C <input type="radio"/> 8b
D <input type="radio"/> 8c
Question 6: Where should the mailer sign?
A <input type="radio"/> Box 15
B <input type="radio"/> Box 1
C <input type="radio"/> Box 9b
D <input type="radio"/> Box 13

## Addresses - Instructions

This part of the real test consists of 60 questions, presented as rows in a table. Each correct answer adds 1 point to your score, and each incorrect answer subtracts a third of a point. In each question you are required to compare both the address and the zip code between the columns. Mark according to the following:

- A. No errors.
- B. Error(s) in the Address part only.
- C. Error(s) in the Zip Code part only.
- D. Error(s) in both parts.

You must remember these by heart before starting. You have exactly **6:00** minutes to complete this part of the test.

Good luck!
